Course Overview

Agile Project Management is designed to support project professional who are seeking an adaptable and flexible approach to managing change and uncertainty within projects. The framework is highly scalable and is commonly used alongside established methodologies such as PRINCE2®.

The structured AgilePM framework is designed to help professionals deliver change with greater flexibility, control and confidence.

Content

The Agile Project Management course will:

- Explain how to lay the foundations for successful agile projects
- Explain how an agile project is managed

- Clarify the different management styles needed for successful agile projects (compared to 'traditional' projects)
- Provide integration with PRINCE2® Training

The course includes:

- 10 modules with associated interactive and video presented lessons
- Notes to support each lesson and references to the AgilePM® handbook
- Module level exam simulation directly aligned to the AgilePM® syllabus
- Online support, forums, chat and progress reports
- AgilePM® Foundation and Practitioner exam simulations
- Interactive exercises to consolidate the learning
- Extensive Exam Approaches module to support the "Objective Testing" Practitioner exam

How long should I study for?

To complete the Introduction level competency, we recommend about 5 hours for learning and reflection, 20 hours for Foundation level and approximately 30 hours (cumulative) for Practitioner level study and qualification. This study will be a mixture of computer-based training using the e-Learning platform, reference to the AgilePM® manual and other support documents and completion of the practical tasks and tests. Depending on other commitments, you will require anything from 2 weeks to 6 months to complete this learning.

Purchasing this product provides you with a license to use AgilePM® Passport and the e-Learning platform for a period of 12 months from the date of purchase.

AgilePM® Foundation with Exam - £995

Agile PM® Foundation and Practitioner with Exam - £1,295

Benefits

Agile Project Management provides a flexible yet controlled process to deliver solutions. It enables organisations to gain the benefits of an agile approach without introducing unnecessary risks. This enables a measured and balanced change, keeping what is good in the current organisation and retaining existing good practices around project management and delivery whilst gaining the benefits of a more agile way of working. AgilePM® combines effective use of a team's knowledge together with techniques such as iterative development and modelling to achieve tight project delivery timescales. It offers flexibility while still recognising the processes and controls that give you, as a project manager, confidence to run your projects effectively.
